

# Zhenyu Sun

✉ [zhenyusun-walker.github.io](https://github.com/zhenyusun-walker) ✉ [austin.garfield.sun@gmail.com](mailto:austin.garfield.sun@gmail.com) ☎ (+86)-138-6767-2318 📄 [Google Scholar](#)

## EDUCATION

**Shanghai Jiao Tong University** Starting in Fall 2026  
*Upcoming PhD student in Computer Science, School of Artificial Intelligence*

**South China University of Technology** 2022 – 2026  
*BSc in Artificial Intelligence, School of Future Technology*

## RESEARCH INTERESTS

**3D Computer Vision**  
*Robust, efficient, adaptive and physically plausible 3D reconstruction and generation*

**Generative World Model**  
*World understanding, disambiguation, and prediction, with geometry and physics-based protocol*

**Multimodal Intelligence and Generalized Intelligence**  
*Multimodal perception for accurate and robust action; transferrable cross-modality intelligent system*

## PROFESSIONAL EXPERIENCE

**Shanghai Jiao Tong University** | *Research Intern* March 2026 – Present  
Advised by Prof. Yuanbo Xiangli

**Shanghai Jiao Tong University** | *Research Intern (Remote)* September 2025 – February 2026  
Advised by Prof. Yuanbo Xiangli

**Westlake University** | *Research Intern* August 2024 – May 2025  
Supervised by Prof. Huan Wang

**South China University of Technology** | *Research Intern* September 2023 – August 2024  
Supervised by Prof. Qi Liu

## SELECTED PUBLICATIONS

- [1] **Zhenyu Sun**, Xiaohan Zhang, Qi Liu, Huan Wang. “CGGS: Consistency-Augmented Geometric Gaussian Splatting for Ego-Centric 3D Generation.” *Transactions on Image Processing* (2026).
- [2] Jingfeng Guo, Jinnan Chen, Weikai Chen, **Zhenyu Sun**, Lanjiong Li, Baozhu Zhao, Lingting Zhu, Xin Wang, Qi Liu. “GarmentX: Autoregressive Parametric Representations for High-Fidelity 3D Garment Generation.” *ArXiv* (2025).
- [3] Xiaohan Zhang, **Zhenyu Sun**, Yukui Qiu, Junyan Su, Qi Liu. “Toy-GS: Assembling Local Gaussians for Precisely Rendering Large-Scale Free Camera Trajectories.” *Association for the Advancement of Artificial Intelligence* (2025).
- [4] Xiaohan Zhang, Yukui Qiu, **Zhenyu Sun**, Qi Liu. “Aerial-NeRF: Adaptive Spatial Partitioning and Sampling for Large-Scale Aerial Rendering.” *ArXiv* (2024).

## HONORS AND AWARDS

**Excellent Graduate Thesis**, *South China University of Technology* June 2026

**National Scholarship**, *Ministry of Education of the People’s Republic of China* October 2025

**The Second Prize Scholarship**, *South China University of Technology* September 2025

**National Scholarship**, *Ministry of Education of the People’s Republic of China* October 2024

**The First Prize Scholarship**, *South China University of Technology* September 2024

**National Second Prize of MathorCup Mathematical Application Challenge**, *China Society of Optimization, Overall Planning, and Economic Mathematics* April 2024

**Honorable Mention of MCM/ICM**, *Consortium for Mathematics and Its Applications (COMAP)* February 2024

**First Place in the Huawei ICT Competition**, *Guangdong Province, Huawei Technologies Co., Ltd.* November 2023

**First Prize in Guangdong Province for the National Undergraduate Mathematics Competition**, *Chinese Mathematical Society* November 2023
